05/10/2010 03:22 PM

Dear Mr. Drake

This message is to inform you that the former CEE Associates (InteliData) site located on 80 Pickett District Road, New Milford, Connecticut is expected to meet the Resource Conservation and Recovery Act (RCRA) Corrective Action Construction Complete milestone by September 30, 2010. This milestone is tracked by the U.S. Environmental Protection Agency (EPA) for sites that are subject to RCRA Corrective Action. The Construction Complete milestone documents that physical construction of the last corrective measure has been completed and all remedial systems are fully functional as designed, whether or not final clean-up levels have been achieved.

EPA is aware that for several months ERM, the environmental consultant for the InteliData project, has attempted communications with Connecticut Light and Power (CL & P), the utility that has rights to the former transformer known as Area of Concern Eight at the former InteliData facility, to obtain transformer access and information. To ensure that Former CEE Assoc. (InteliData) is able to achieve the Construction Complete milestone on schedule, we respectfully request, by July 1, 2010, an update on the progress you have made towards working with CL & P. If CL & P has not granted your company access permission by July 1, 2010, EPA intends to request access permission from CL & P on your behalf. In the mean-time, please respond, by June 1, 2010, with the contact information for the CL & P representative with whom you have been dealing.

If you have further questions regarding corrective action goals, please do not hesitate to contact me at (617) 918-1617 (stfleur.marilyn@epa.gov).

Marilyn St. Fleur
